TP2 Team Norms

Team 53 | CSE 360 | Updated October 28, 2026

These norms update the team's submitted TP1 norms using the supplied TP2 wording. Deleted TP1 wording is struck through; inserted TP2 wording is underlined. Each norm includes the reason for the change. The editable source retains actual Word tracked insertions and deletions.

1. Updates TP1 norm 1

> Hold ~~2 "standup"~~ at least two 15-minute standup meetings ~~a week. (Required by course, provides clarity between team's expectations)~~each week, at least 24 hours apart, and record each one.

Reason for change: Required by the course for at least six standups per phase; regular check-ins surface problems early.

2. Updates TP1 norm 8

> Review and test the integrated work ~~as a team~~ together before ~~submission. (Ensures the final application and deliverables function together correctly rather than merely having individually completed components)~~every submission.

Reason for change: Confirms the combined application and deliverables meet the team's expectations, not just each person's piece. Moved from TP1 norm 8 to emphasize integration.

3. Updates TP1 norm 2

> ~~Being responsive; WITHIN~~ Respond to team messages within 6 ~~hours. (Ensures quick communication~~ hours during the day, and by the next morning for ~~effectively mitigating problems)~~messages sent late at night.

Reason for change: Quick replies let the team resolve problems before they delay others. The overnight exception makes the response expectation clear.

4. Updates TP1 norm 3

> ~~Being punctual for group meetings,~~ Arrive on time to team meetings and ~~participating~~ take part in the ~~discussions. (To make sure we can coordinate efficiently)~~discussion.

Reason for change: Lets the team coordinate efficiently and make decisions with everyone's input.

5. Updates TP1 norm 4

> ~~Being~~ Be respectful and ~~understanding. (To avoid miscommunication and have better~~ understanding toward every team ~~spirit)~~member.

Reason for change: Reduces miscommunication and builds a stronger working relationship.

6. Updates TP1 norm 5

> ~~Attempt to reach~~ Work toward a compromise ~~for disagreements. (Human civilization is built, and runs on this)~~when members disagree.

Reason for change: Keeps disagreements from stalling progress and gives everyone's view a fair hearing.

7. Updates TP1 norm 6

> Complete assigned work by the ~~team-agreed~~ team's internal ~~deadline. (Provides sufficient time for review, testing, integration, and correction before the official submission deadline)~~deadline.

Reason for change: Leaves enough time for review, testing, integration, and corrections before the official deadline.

8. Updates TP1 norm 7

> Coordinate ~~changes that affect~~ before changing shared code or another member's ~~work before implementing them. (Prevents conflicting implementations and reduces integration problems)~~work.

Reason for change: Prevents conflicting changes and helps the separately built pieces work together correctly.

9. New norm

> Tell the team as soon as you are blocked or may miss an internal deadline.

Reason for change: Lets others adjust or help in time, instead of finding out at the deadline.

10. New norm

> Pull the latest code before starting work, and commit only source files, not compiled bin files.

Reason for change: Avoids merge conflicts and keeps the shared code consistent for everyone.

Team members: Vishwam Gupta; Joshua Luther; Kanish Garg; Aditya Gupta (agupt515); Aditya Gupta (agupt545).
